

# HEPA PRO 20-250

Introducing the most compact, portable HEPA Vacuum offering 250CFM of airflow. Model HEPAPro20-250 is equipped with two powerful dual-stage motors, operating on 120 volts. This latest addition to the HEPAPro line is OSHA compliant, and exceeds tool manufacturers recommended airflow for dust control using two 5-inch grinders or one 7-inch grinder. An extra large, disposable synthetic filter bag contains the dust and allows operators to work long periods without interruption due to clogging and restricted air flow. It also makes handling and disposing of dangerous silica dust more safe and hygienic for workers.

The HEPAPro20-250 is a genuine HEPA Vacuum. It is equipped with a tested and certified HEPA filter. In addition to the recovery of silica dust, this vacuum provides safe and efficient pick-up of other hazardous materials including asbestos and mold. It also exceeds EPA's Renovations, Repair and Painting Rule (RRP) for safe lead dust recovery.

## KEY FEATURES:

- Two commercial grade, 2-stage bypass motors for super high air flow and quick, complete recovery of fine dust and other hazardous materials.
- Individually tested and certified HEPA Filter, minimum efficiency of 99.97% at .3 microns based on particle count test method, IEST-RP-CC001.
- Dacron Filter Bag protects HEPA Filter and automatically purges dust without vibration or pulse.
- Unique hose inlet allows connection to either 1.5 or 2-inch hose.
- 50-foot power cord for working large areas without stopping to locate an outlet.

## TECHNICAL SPECIFICATIONS:

Item Number:	125-1210-20
Style:	Dry Only
Horsepower:	3.4
Waterlift:	100"
CFM:	250
Recovery:	20-gallons
Filtration System:	Individually tested and certified HEPA filter 99.97% efficient at .3 microns. Secondary pre-filter Dacron bag. Disposable synthetic filter bag (item #122-3225-14)
Power cord:	50 feet
Weight:	50 lbs.
Warranty:	1 year

TOOL KIT INCLUDED:	
Part #	Description
122-3026-14	2" X 40" Extension Wand (two-piece) with Handle Grip
122-3016-14	2" X 16' Wire Reinforced Hose
122-3046-14	2" X 14" Floor Nozzle w/Brush
122-3066-14	2" X 9" Crevice Tool
122-3036-14	2" Right Angle Brush Tool
122-3086-14	2" to 1-1/4" Adapter (connects to dust shrouds)

A collection of tools included in the kit, including an extension wand, a hose, a floor nozzle, a crevice tool, a right angle brush tool, and an adapter.

# HEPA PRO 20-250

Lift handle with hook: Provides cord storage and supports lifting heavy contents.

Injection molded motorhead

Steel clamps: Secures motor head during handling and transportation.

Hose Inlet accepts either 1.5" or 2.0" hoses. Positive air seal (no leaks).

Blow molded high-density polyethylene canister: Resists impacts, supports heavy debris and easy to lift and empty.

Four swivel casters: Superior mobility even when full with heavy debris.

Extra large disposable synthetic filter bag holds 25 lbs of concrete dust. Less time changing out filter bags due to clogging and loss of airflow.

Disposable synthetic filter bag: Item #122-3225-14

## TESTED & CERTIFIED HEPA FILTER:

The HEPAPro13-250 is equipped with a "Fail-Safe" HEPA filter system that protects against discharge or bypass of dangerous dust particles from the vacuum cleaner. This modular, removable HEPA filter drops-in the vacuum body and automatically seals under suction. There is zero risk of the operator incorrectly installing the HEPA filter and accidentally causing bypass of particles in the air. Also, in the event of a failure, by rupture or the like, of the disposable collection filter bag or one of the other filter components, the HEPA filter is the final filter and it is certified to prevent any discharge of dangerous dust in the air.

The HEPA filter is individually tested and certified to be 99.97% efficient at .3 microns according to IEST-RP-CC001 test requirement.

### HEPA Filter Assembly

Polyester Prefilter 128-7504-14

Spacer Sleeve 128-7503-14

Dacron Filter Bag 122-3222-14
