

HEPA PRO 20S

Introducing the only front mounted squeegee HEPA Vacuum available today. HEPAPro 20S provides the same powerful two horsepower motor, large recovery capacity (20-Gallons) and tested and certified HEPA filter equipped in our popular HEPAPro 20. The addition of a 29-inch wide floor squeegee makes this one of the most unique products in the restoration and floor care industries. When recovering floor liquids during restoration projects or general floor maintenance including strip and recoating, there is always significant risk of harmful particles becoming airborne. A front mounted squeegee "HEPA Vacuum", equipped with a tested and certified HEPA filter is your only guarantee of trapping and containing these dangerous particles before they are inhaled by maintenance workers or other building occupants.

Warning: Many vinyl composition tiles (VCT) or the adhesives used to adhere the tiles to the floor substrate include asbestos fibers. Floor cleaning, stripping and polishing machines, including automatic scrubbers can disturb or damage tiles, resulting in dangerous asbestos fibers being released into the air. If inhaled over time, these fibers can cause serious illnesses including asbestosis and mesothelioma.

Warning: OSHA's new crystalline silica rule effective June 23, 2017 requires employers limit worker exposures to respirable crystalline silica during common construction, restoration tasks including sanding, grinding and other sub-floor preparations. Exposure to respirable crystalline silica can cause silicosis, lung cancer and other respiratory diseases.

FEATURES:

- 2HP Commercial grade, 2-stage bypass motor for quick, complete recovery of most types of hazardous materials.
- Individually tested and certified HEPA Filter, minimum efficiency of 99.97% at .3 microns based on particle count test method, IEST-RP-CC001.
- Front mounted 29-inch squeegee assembly with foot pedal for quick, one-pass recovery of liquids from floor.
- Reliable liquid shut-off allows the operator to vacuum liquids uninterrupted until the tank is full and without risking damage to the HEPA Filter
- Drain hose for fast and easy emptying of tank's liquid contents.
- 120V outlet with on/off activation of vacuum using power tool or other appliance.
- 50-foot power cord for working large areas without stopping to locate an outlet.

OPTIONAL ACCESSORIES

122-3010-14	Crushproof Hose 10' x 1.5" Dia
122-3020-14-1	Steel Wand Double Bend 5' 2-Piece 1.5" Dia
122-3030-14	Round Dusting Brush 1.5" Dia
122-3040-14-1	Floor Brush Tool 14" x 1.5" Dia
122-3050-14-1	Floor Squeegee Tool 14" x 1.5" Dia
122-3060-14	Crevice Tool 17" x 1.5" Dia

HEPA PRO 20S

TECHNICAL SPECIFICATIONS:

Item Number:	125-1215-10
Style:	Wet or Dry
Waterlift:	105"
CFM:	110
Recovery:	20-gallons
Filtration System:	Cloth dust bag & frame, Mesh wet filter
Power cord:	50 feet
Warranty:	1 year
Weight:	69 lbs.

HEPA Filter Assembly 127-3305-14

TESTED & CERTIFIED HEPA FILTER:

The HEPAPro10 is equipped with a "Fail-Safe" HEPA filter system that protects against discharge or bypass of dangerous dust particles from the vacuum cleaner. This modular, removable HEPA filter drops-in the vacuum body and automatically seals under suction. There is zero risk of the operator incorrectly installing the HEPA filter and accidentally causing bypass of particles in the air. Also, in the event of a failure, by rupture or the like, of the disposable collection filter bag or one of the other filter components, the HEPA filter is the final filter and it is certified to prevent any discharge of dangerous dust in the air.

The HEPA filter is individually tested and certified to be 99.97% efficient at .3 microns according to IEST-RP-CC001 test requirement.

STERLING	
Part No.	127-3305-14
TEST-RP-CC001, Type A, Grade 6, 105 CFM	
This HEPA filter is tested and certified to have a minimum efficiency of 99.97% at 0.3 microns.	
Serial number	71820236
Penetration rate	0.025%
Pressure drop	27 in H ₂ O

Disposable synthetic filter bag: Item #122-3224-14
